# REVERSO ADVANTAGES

## THE STYLE : MODERNITY AND FLEXIBILITY

The Reverso model stands out for its unique look, which can be rotated 180°, and is suitable for unusual and modern establishments. Your establishment will change its look and your security will be reinforced. Its slightly open and curved shape will allow you to easily access the extinguisher, from one side or the other depending on the direction of the cover, allowing you to combine style and practicality.

## SCALLOPED SHAPE :

The Reverso model is distinguished by its unique and daring indented shape. A real decorative piece, its design is an invitation to access the fire extinguisher.

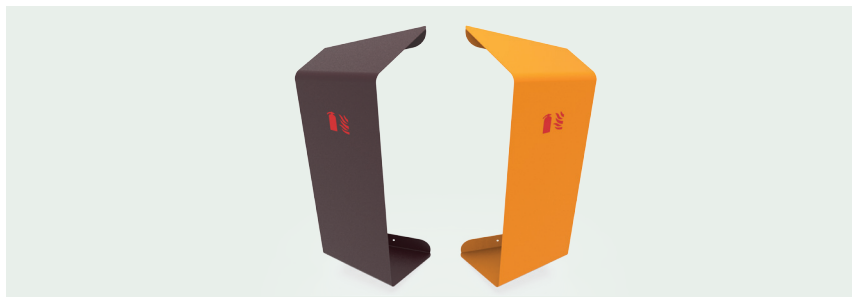

## SAFETY: INCREASED PROTECTION OF THE FIRE EXTINGUISHER

Ensured by 1.5mm of steel constituting the cover.

Its ergonomic design protects the extinguisher from:

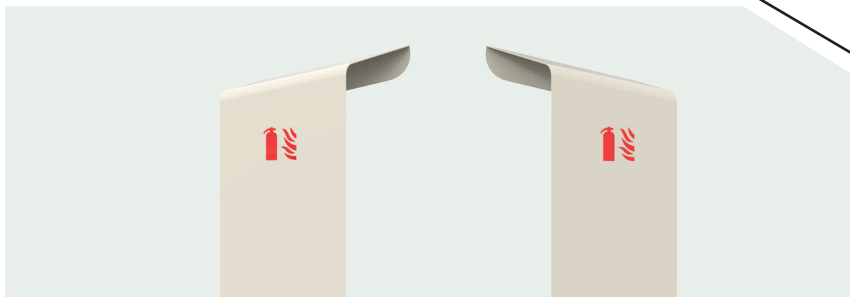

- Voluntary degradations (vandalism)
- Unintentional damage (shocks)

Allowing to offer a much better guarantee that the extinguisher is functional.

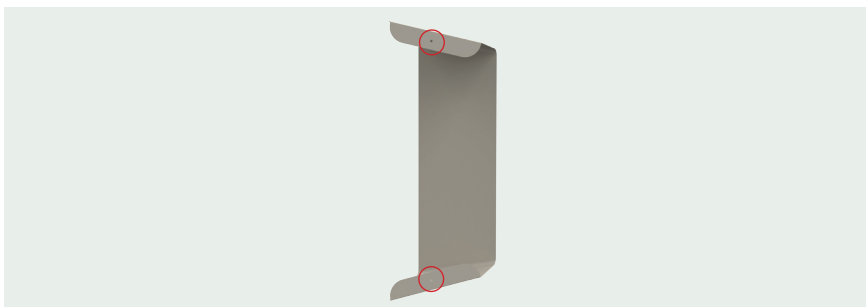

# REVERSO ADVANTAGES

## **VISIBILITY :**

### INTEGRATED FIRE EXTINGUISHER SIGNAGE

Standardized fire extinguisher pictogram: 1x red adhesive vinyl to be placed on the front of the hood. It will reinforce the visibility of the extinguisher. Before sticking it, remember to determine the direction of the hood.

## **WALL MOUNTING :**

### INTEGRATED FIRE EXTINGUISHER SIGNAGE

On the back of the cover there are two folds of material, each with a hole, allowing the Reverso to be leaned against and fixed the Reverso firmly to the wall. The extinguisher must rest on its approved support fixed to the wall.

## **ACCESSIBILITY :**

### OPENING SYSTEM

The «Free» system. The Reverso is, as its name indicates, reversible. Access to the extinguisher is determined by the direction in which the cover is installed: in one direction the opening is on the right and in the other on the left. The extinguisher is freely accessible on the left or right side. Simply lift the extinguisher slightly and pull it out from either side.

# REVERSO ACCESSORIES

## EXTINGUISHER SIGNAGE PLATE

AS A WALL INSTALLATION. IT DISCREETLY FIT THE WALL-MOUNTED FURNITURE.
